Welcome to Zebritia Newsletter

Hello and Welcome to Zebritia Newsletter. Thinking over the last week about what topics to write about in this newsletter became difficult. I want to keep busy at Zebritia but I may also include some of my bio thoughts and outings. I hope you readers don't get bored with me.

Thank you!

Latest News

I am getting back into code programming and set my goal to make a custom music Equilizer for iOS and linux:

Q: How long have I been coding for?

A: I have been coding for over 30 years in various fashions. I have reviewed many types of code from c++, html, java, php, python, ect..

Q: How did I learn coding and programming?

A: Decades ago I played a lot of shareware pc games and got into CD-Rom's, back then it was not as simple as plug n play. We had to actually source code, patch files, I learnt early on that I can configure code in txt form.
